Web Site for the U.S. Cost of Corrosion Study

Released in 2002, "Corrosion Costs and Preventive Strategies in the United States" summarizes an intensive two-year study on the direct costs associated with metallic corrosion in nearly every U.S. industry sector, from infrastructure and transportation to production and manufacturing. For complete information about the study, as well as associated articles, presentations, links, and more, see CC Technologies' dedicated cost of corrosion Web site: www.corrosioncost.com.

DoD Partners with NACE International

The DoD is working closely with NACE on a number of initiatives to improve corrosion-control efforts and employ best practices to protect the military assets in all of its services. NACE is developing a "Corrosion 101" online corrosion course for DoD personnel and is organizing the 2005 Tri-Service Corrosion Conference, to be held November 14 to 18 in Orlando, Florida.
